Diamond Cloud

Diamond Cloud keeps your data secure and your system costs low.

Secure, cloud hosting with Microsoft Azure. The affordable choice for insurers seeking a highly innovative, repeatable, scalable cloud platform.

With Diamond Cloud, pay for the power you need, when you need it and leave management of the system to the experts.

- **Reduce risk**

  Let the experts manage the system. With Diamond Cloud, we will host, deploy, and maintain your core platform on Microsoft Azure.

- **Always relevant**

  The latest innovations are at your fingertips with bi-monthly upgrades via the Diamond Cloud. Take advantage of our latest cloud-native capabilities, Azure innovations, and insuretech integrations.

Why most of our clients are choosing Diamond Cloud:

Diamond Cloud combines our software, services, and ecosystem in a scalable and cost-effective model. Our Diamond Cloud users receive product updates every other month which enable them to take advantage of product or technology enhancements without interruption to their business.

Scalability.
A multi-tier application that scales economically by adding virtual resources to the web and business logic application tiers.

Interoperability.
Interoperates smoothly with existing systems, while providing a secure foundation for future migrations.
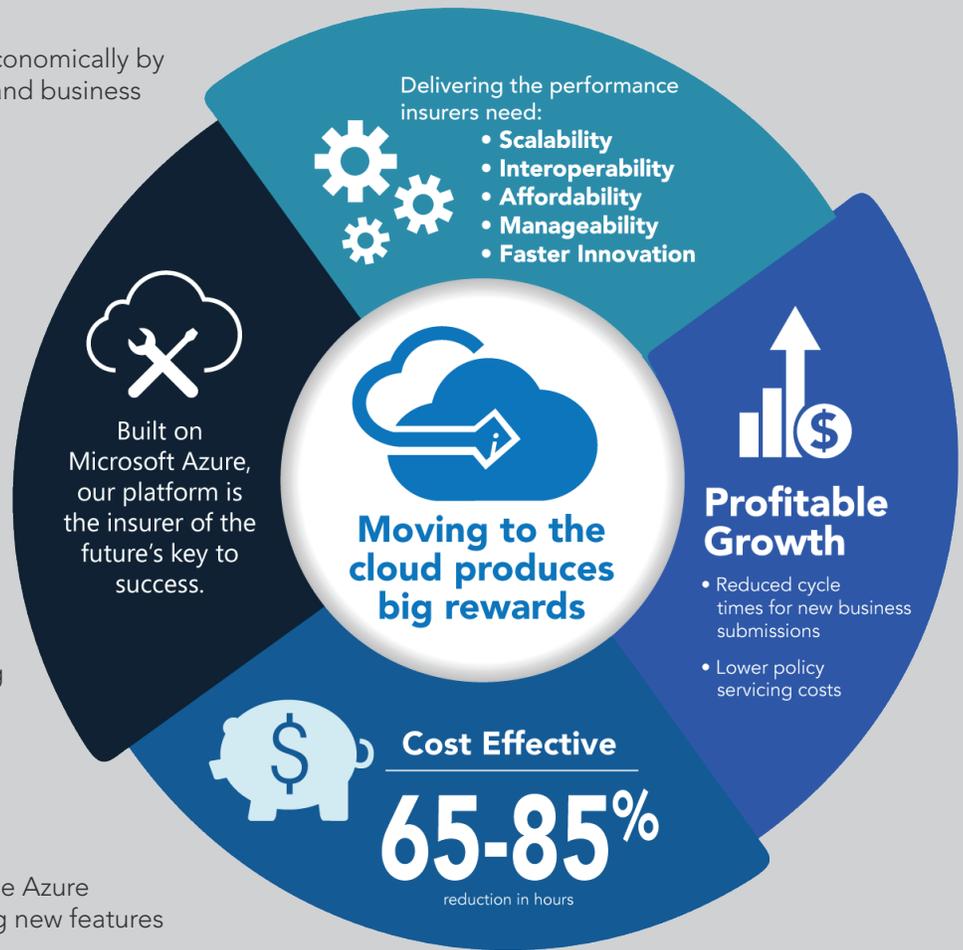

Affordability.
Single-node systems can be scaled-up with more memory and processing power or scaled-out with many nodes.

Manageability.
Microsoft Azure takes care of all hardware, OS, and platform patching requirements. We reduce the cost and complexity of deploying and administering Diamond Systems.

Faster Innovation.
Application components built into the Azure platform cut the time it takes to bring new features to market.

Delivering the performance insurers need:
- **Scalability**
- **Interoperability**
- **Affordability**
- **Manageability**
- **Faster Innovation**

Built on Microsoft Azure, our platform is the insurer of the future's key to success.

Moving to the cloud produces big rewards

Profitable Growth
- Reduced cycle times for new business submissions
- Lower policy servicing costs

Cost Effective
65-85%
reduction in hours

About Insuresoft

Insuresoft is a privately held independent software vendor with offices in University Park, IL and Tuscaloosa, AL. Insuresoft's flagship product, Diamond, is a digital insurance platform comprised of policy, billing, claims and analytics modules that are utilized by property and casualty insurers. The platform processes all personal and commercial lines of business across all 50 states. Insuresoft's clients span the continuum from start-up MGAs to some of the largest carriers and brokers in the United States.
